Subject: MS Settlement grossly unfair to Apple

Steve Jobs is right!

The education market is one place where Apple has a good presence, and Bill Gates "donating " \$1-2 Billion of rejuvenated PC's and Windows XP to schools is really cutting Apples' support.

If Gates offer is so good why doesn't he donate 50% of it in rejuvenated Macintosh's , or at least the percentage of Apple Mac's in the school system, rather than all PC's - which toots his own horn at Apples' expense.

I certainly believe that this DOJ allowance is not ethical and needs to be redone right by MS giving MONEY alone and none of Microsoft products.

I really believe that the DOJ caved into MS! or there is a mole in the DOJ which likes MS!
That stinks!
